Before and After Photos

We are very excited to introduce the **Vital RF**, a non-invasive, Radio Frequency (RF) aesthetic device that tightens skin, re-contours the face and body, and reduces cellulite (orange peel skin). This safe and comfortable treatment works for all skin types and colors, and offers solutions to the inevitable problems of weight gain and aging skin.

Tightens and Tones

22 years old - 8 treatments

The Vital RF technology is a non-surgical alternative to weight loss and body re-contouring. Tighten lines and sagging skin and remove excess weight without pain and down time.

Results from the First Treatment

See results from the first treatment and know that each treatment brings better results. Impressive results seen by the fifth session. Most conditions for the body require ten sessions and six sessions for the face and neck.

The Vital RF Solution

- Tightens the jaw line, reduces jowls, re-contour the chin line and reduces excess tissue under the eyes.

66 years old - 8 treatments

- Smooth the orange peel look caused by cellulite, tighten loose skin and re-contour body measurements.
- Firm the breast, tighten loose skin under the arms or on the stomach.

- A non-surgical alternative for obesity and liposuction treatments.
- Excellent for pain relief and increased healing recovery - Sports Medicine - Post Surgical.

Dermavista.com is a subsidiary of Market Technologies, Inc. serving the aesthetic industry as distributor of LIOSS Technology, Vital RF devices, Dermata-touch microdermabrasion systems, Vascutouch electro coagulation system, in addition to the Atache line of skincare products.

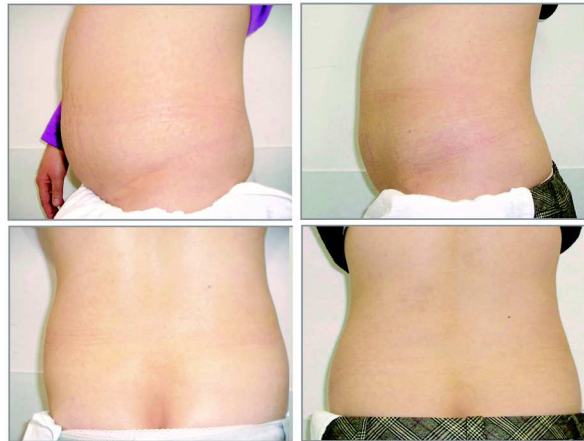

The Science

Vital RF is effective on subcutaneous fat, a noticeable layer of fat that lies just below the skin. It sends radio frequency (RF) deep into tissue to create volumetric tissue heating at a controlled temperature. The RF targets tissue such as cellulite that is full of fluids, and melted fats are released.

The insulated electrodes used in the treatment, along with a grounding plate, allow heat to penetrate uniformly up to 20 mm deep and maintain the temperature in the tissue between 40-43 C. This allows adipose to be dissolved and stimulates collagen synthesis to affect tissue tightening, lifting and wrinkle removal. Oxygenation is increased. Venous and lymphatic drainage is activated.
